-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1, 3-30 are rejected under 35 U.S.C. 102(a) as being anticipated by JP2001084839.

'839 discloses a method for protecting a screen of an electronic device, comprising the step of contacting a protective film onto the surface of the electronic screen, whereby the protective film suppresses formation of Newton rings when the film is installed in contact upon the screen; the film is biaxially oriented polyethylene terephallate; the film is selected from the group of polycarbonate wherein one surface of the polymeric film includes a resin is non-uniformly disposed; resin contains particles. (Abstract).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim2 is rejected under 35 U.S.C. 103(a) as being unpatentable over JP2001084839 in view of Miyata et al. (U.S. Patent 5,745,288).

Art Unit: 3726

'839 teach the limitations as claimed above with the exception of the protective film is slidably contacted to the surface of the electronic screen between a gap.

Miyata et al. teach the protective film is slidably contacted to the surface of the electronic screen between a gap (claim 1).

It would have been obvious to one of ordinary skill in the art at the time of the invention was made to utilize the protective film that is slidably contacted to the surface of the electronic screen between a gap, as taught by Mityata et al. in the method of '839 so as to protect the electronic screen.
